**Contact Phone**- (541) 357-8264

## Build Overview

Built by Volcano Vans in Bend, Oregon USA. Designed for those who typically travel with more than a party

of 2 but value the compact size the 159 Promaster offers. This rig seats 4 and sleeps 4 comfortably with all features and functions you may need on/off the road. A true multi-season adventure van built to keep your crew comfortable on those cold nights at the mountain or those warm days at the beach. Dark color tones and natural wood were incorporated into this build to create a level of warmth with a cabin like atmosphere.

A convertible layout enables you to enjoy the van in "Day mode" - Allowing you to open up a cozy 2 person dinette area just aft of the galley. Looking for more floor space - collapse your Stow-n-Go seat. Got gear? There are L-track attachment points and stowage areas throughout the build. 300ah of Lithium batteries will power your induction burner for cooking and give

you hot water at the galley or the outdoor shower. A hidden marine grade toilet will keep everyone comfortable.

On the roof you will find the FVCO Low Pro roof rack along with a side ladder to access your gear. Ultra Toil black matte wheels with BF Goodrich AT T/A KO2 tires will keep you rolling in any season.

## Build Details
